SUMMARY

I'm a software engineer who builds full web apps with Next.js, React, and TypeScript — from AI-powered tools to online learning platforms. I like owning a feature from first idea to finished product, and I've led small teams to ship real projects under deadline. What drives me is building things people use every day: products that help them learn faster or work better. I'm looking for a team where I can keep growing and do work that genuinely helps people.

PROJECTS

Aegis — AI Property-Monitoring Platform

PineQuest Hackathon Ep.2 · Jun–Jul 2026

Team Lead (5 people)

- Led a 5-person team building an AI platform that flags apartment common-area violations (smoking, vaping, littering) from live security-camera feeds.
- Built a two-stage vision system — a fast YOLOv8 edge model screens frames, then Gemini 2.5 Flash confirms the behavior — sending only high-confidence events (0.7+ score) to Cloudflare storage to cut cost.
- Added automatic camera discovery and multi-stream ingestion (ONVIF/RTSP, FFmpeg) for up to **30 live cameras**, plus a fault-tolerant layer that keeps the dashboard running through network dropouts.

Brisk — AI Meeting Assistant

PineQuest Hackathon Ep.1 · Jun–Jul 2026

Team Lead (5 people)

- Led a 5-person team building an AI meeting hub that records, transcribes, and turns meetings into clear action items — reaching **~80% accuracy** and cutting forgotten follow-ups by **18–25%** in internal testing.
- Built the core service that converts multi-speaker transcripts into formatted reports inside Google Docs, using serverless workers and the Google Docs API.
- Integrated Google Workspace (Drive, Docs, Gmail) with OAuth 2.0 and secure token handling, and automated email delivery of summaries the moment a call ends.

Mazaalai-Learn — Gamified Script-Learning App

Pinecone Academy Internship · 2026

Team of 6

- Built a global leaderboard and ranking system (Next.js, Hono, Drizzle, Cloudflare D1/SQLite) with edge caching to stay fast under heavy traffic.
- Developed AI audio evaluation and translation that scores pronunciation with real-time feedback, and cut initial load time by **50%** by migrating the monorepo to Bun.

Code: github.com/danny-oko/mazaalai-learn · Live: mazaalai-learn.vercel.app

Online Education Platform

Freelance · Ulaanbaatar

- Built a fully responsive learning platform with an admin dashboard for lessons, users, and content; grew to **2,500+ users** and **1,400+ enrolled students**, generating **₮200M** in course revenue.

Logistics & Customs Automation

Freelance · Ulaanbaatar

- Built an automated customs-clearance system integrating LPR cameras and weight sensors, wired into Mongolia's national customs database across **6 posts**; used by 108 Oil, Altan Logistics, BlueRoad, and FBLG.

EXPERIENCE

Founder & Project Manager — XP Freelancing Agency

Jun 2025 – Feb 2026 · Ulaanbaatar

- Founded and led a freelance agency that delivered **5 client projects in 8 months**, doing hands-on development while managing planning and client communication.

Technical Coordinator — First Church

2022 – Present · Part-time · Ulaanbaatar

- Ran audio, stage, and technical production for weekly services (**180+ attendees**) and **150+ events**, including a national youth event with 300+ participants.

SKILLS

Languages: JavaScript, TypeScript

Frameworks: React, Next.js, Hono, Express.js, Electron

Backend & Tooling: Node.js, Bun, Drizzle, Prisma

Databases & Cloud: PostgreSQL, SQLite, MongoDB, Cloudflare, Supabase, Vercel

AI & Integrations: LangChain, Gemini, YOLOv8, Firebase, Google Workspace APIs, OAuth 2.0

Tools: Git, Vim

STRENGTHS

Team leadership · Client coordination · Owning features end to end · Delivering under deadline

EDUCATION

Software Engineering

Pinecone Academy

Oct 2025 – Jul 2026 · Graduated

High School Diploma

Amjilt Cyber School

Graduated Jul 2025
